

Satellite radio is under attack. The National Association of Broadcasters (NAB), the group that represents the large radio and television owners, is using its lobbyists, campaign contributions and political influence to stifle competition and stop XM from offering traffic and weather information and other valuable services to listeners.

I would like for you to know that I support Satellite radio and would hate you see on the records that you voted in anyway against it. Competition and free enterprise is the back bone of our great nation.
